Skills

- React
- TypeScript
- Next.js
- Redux
- Sass
- etc...

Employment History

Middle Front-end Developer at Alar Studios, Budva

October 2020 — June 2023

Role:

- Collaborated with the development team to architect the core structure.
- Created unit, integration and e2e tests with jest react-testing-library and cypress
- Implemented real-time features using technologies such as WebSockets. Ensured efficient handling of real-time data synchronization and communication between users
- Collaborated with cross-functional teams, including UX/UI designers and backend devs

Junior Front-end Developer at Os-system, Odessa

July 2018 — September 2020

My role:

- Identified and resolved front-end bugs, UI glitches and performance issues.
- Participated in code reviews, provided constructive feedback.
- Ran tests and ensured cross-browser support.
- Used Axios library to fetch data from server, serialize and render it
- Designed and developed interactive charts and visualizations that effectively represent data

Education

Bachelor, Kyiv State University of Infrastructure and Technologies, Kyiv

September 2015 — May 2019
